No. 34

The Secret of The Best Good Shoe

It is the secret of the deacon's shay made famous in the poem of Oliver Wendell Holmes.

"Have you heard of the wonderful one-hoss shay,
That was built in such a logical way,
It ran a hundred years to a day?"

The deacon observed that a chaise breaks down but does not wear out, so he reasoned

"The weakest place must stan' the strain,
An' the way ter fix it, as I maintain,
Is only jest ter make that as strong as the rest."

That well-balanced construction of part for part is the secret of the wearing qualities of "INVICTUS" shoes. They are so made that "the weakest part will stand the strain."

J. V. BERSCHT

BILL BAILEY

will have a car of fruit here
TUESDAY THE 12TH

This car will consist of
Prunes, Peaches, Grapes, Pears,
Green Tomatoes, Ripe Tomatoes,
Crab Apples, Cucumbers and
Apples

Now I have bought this car of fruit right and can sell it at prices that no one can compete with

I have no doubt they will tell you a lot of rubbish, but don't mind what they say but come and see the goods.

BILL BAILEY
We Always Has the Goods
P. S.—Car of salt just in.

AROUND THE TOWN

Miss Mabel Finkbeiner has gone home on a visit to Camrose.

Mr. Cecil Studer has gone to Calgary to attend the Western Canada College.

Mayor H. B. Atkins left on Wednesday to attend the Liberal convention at Red Deer.

Mr. Bruno, of the firm of Durrer & Bruno, was a visitor at Calgary on business this week.

Miss Meryl Eubank was taken to the Calgary hospital on Tuesday to undergo an operation for appendicitis.

Mr. A. Berrett is a prospective Alberta settler from Portland, Ore., arriving here from that city the first of the week.

Mrs. Walter Smith returned on Wednesday from visiting at Winnipeg, Toronto, Sarnia and other points in Ontario.

J. Good, manager for the Alberta Culvert Co., is making an extended automobile business trip through the country south of Calgary.

An exciting runaway on Osler street, which enlivened this part of town for a time, occurred on Tuesday afternoon. However, no particular damage was done.

Mr. Elias Meek died Tuesday night at Calgary. Age 56 years. The funeral will take place at the Evangelical church, Didsbury, on Friday at 2 p. m. Friends will please accept this intimation.

There will be a morning service at the Baptist church on Sunday next at 11 o'clock, followed by Sunday School. Subject, The New Birth. Evening service at 7:30; subject, A Truth Four-square. Service at Springside school at 3 o'clock.

The many friends of Tom Stark are pleased to see the old familiar face in our midst once more. He arrived on Monday from Winona, Minn., where he has been engaged in the Minnesota-Wisconsin baseball league. Tom is back in the coal business where he will proceed to cover himself with local color.

The many friends of Mr. and Mrs. F. Moyle, who formerly resided at Didsbury but who are now living at Brantford, Ont., will learn with sorrow that their little daughter Elsie died about a month ago. Mr. Moyle was visiting in the west at the time his little daughter was taken sick but was able to get home a few hours before death took place.

The editor with his son Fred returned from a trip east, accompanied by Mrs. (Rev.) M. Lowry, mother of Mrs. H. E. Osmond. They visited at London, Ont., Chicago, Duluth, Winnipeg, Moosejaw, and several other points and consider that the Didsbury district is just as well off as any part of the country visited. Parts of Manitoba and Saskatchewan are in much worse condition than this district and the drouth in the early part of spring in Ontario and the States played havoc with their crops.

"RECIPROCITY"

One says that Politicians give us Reciprocity for our vote, another says Politicians oppose Reciprocity for a vote, but we in our business, endeavor and do give the best value for money obtained in the lines of

**COOKING RANGES,

SEVEN YEARS OF MISERY

All Relieved by Lydia E. Pinkham's Vegetable Compound.

Siketon, Alta., Oct. 7.—Seven years I suffered everything. I was in bed for four or five days at a time every month, and could hardly walk. I cramped and had backache and head aches. I was nervous and weak, and I dreaded to have anyone come into the room. The doctor said he gave me medicine to help me sleep, but it did not help me to sleep. I used to have an operation. I would not listen to that and when a friend of my husband told him about Lydia E. Pinkham's Vegetable Compound and that it had done for his wife, I was willing to take it. Now I look the picture of health and feel great. I can sleep well, eat well, work hard, my children, and milk a cow. I can entertain company and enjoy them. I can visit when I want to, and work as any ordinary woman any day in the month. I wish I could talk to every suffering woman and girl!"

Mrs. DEMA BETTER, Siketon, Mo.

The most popular remedy in the country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound.

It is widely and successfully used than any other remedy.

It has cured thousands of women who have been troubled with dysmenorrhea, inflammation, irregular periods, irregularities, periodic pains, backache, that bearing down feeling, indigestion, and nervous prostration, after all other means had failed. Why don't you try it?

Hindsight

"For whom is she wearing black—her late husband?"

"No, for her next. She knows she'll be in it,"—Judge.

Complete in itself, Mother graves. Worm exterminator does not require the assistance of any man, and is made to do its work.

Willie Saw It

"Mas—'tis the clock running, Willie?"

Willie—"No, mas; it's just standing still and wagging its tail,"—Judge.

Minard's Liniment Cures Dandruff

One Advantage

"So you have adopted a baby to raise?" we ask of our friend. "Well, it may turn out all right, but don't you think you are taking chances?"

"I am not taking any chances. No matter how many bad habits the child may develop, my wife can't say he inherits any of them from my side of the house!"—Lie.

Baby's Rash Became a Mass of Humor

Parents Decided He Could Not Be Cured, "Cuticles" Soon Made His Skin Perfectly Clear.

A Toronto man, Mr. Robert Mann, of 254 Queen St. East, says his boy was born in Toronto on Oct. 13, 1910, and that he had a similar skin condition appear on his cheek.

When he appeared before a dermatologist, he was told to go home and not to come back again.

We did not know what the doctor said, but we do know that he advised him to go home and not to come back again without a doctor's advice.

The family doctor prescribed a special ointment, but the boy did not get any good, so we took him to a hospital.

He was treated for a week and he got worse, so we took him to another hospital where the boy was to sit in a salt bath, and the doctor said his wife was not to bathe him.

"We decided that it could not be cured and we sent him to a doctor in England, and his arm bandaged to his side to prevent his wife from bathing him as best as he could."

"We decided that it could not be cured and we sent him to a doctor in England, and his arm bandaged to his side to prevent his wife from bathing him as best as he could."

In another letter, dated June 29, 1911, he writes: "The doctor said he did not any more trouble since using Cuticles."

For more than a generation Cuticles Soap and Cream have been the standard of the best cosmetic treatment for skin and scalp troubles of all kinds, and are the most popular of all cosmetics. Although sold by druggists and dealers throughout the world, a large number of people prefer to buy the skin will be sent free, on application to Peter, Peter & Co., Corp., 20 Columbia Ave., Boston, Mass., U.S.A.

AIR BUBBLE POWER.

Northern Ontario Mine Has a Remarkable System.

Once in a mining camp a modern department store completely equipped with telephones, service and mobile delivery and using hydraulics energy over the counter in hundred pound packages, and the city barge man may get a fair idea of what a power plant means in industrial economy, and the same is true of coal supply. Up in Northern Ontario such power as this is more of a miracle than a brick that steams heat and burns. The power, for the motor can run without a battery, but he can't uncover pay rock without power to drive the tools that do it. Then the price of coal in Northern Ontario began to eat into the ore profits the miners harvested the Manitou River for power.

Raged Chutes, the point where the miners located their plants, in the mineral water reservoir in itself. It is ten miles from Cobalt. Here the river for about 1,000 yards whirls around a thirty-five foot grade and for four miles the water is a boiling, foaming torrent.

The theory as practiced was to drop this surging tide down a 300 foot drop into a series of rapids, then to catch the air bubbles as they rose from the water, racing through a subterranean chamber toward a tall shaft leading up again to the surface of the river 1,000 feet downstream.

Building this power plant was a task out bidding anything else in proportion to the estimators fees ever seen. First the low masonry dam was completed, 600 feet across the river, the waterways thus created having a capacity of 1,000 cubic feet per second. Immediately above the dam, in the center of a large concrete basin, two eight-foot steel shafts, each containing sixty-six four-foot sections, were driven to a depth of 200 feet.

A thousand feet downstream the other shaft was sunk into the rocky bed, and there the miners chose a subterranean chamber connecting the two shafts at the upper end of their rapids with a single one at the lower end. This cut the great underground raceway twenty feet wide along its entire length, twenty-x and a half feet high at the bottom of the shafts and forty-two feet high in the center. The whole undertaking was hazardous to an extreme, but neither officers nor men will admit it. It was all in the day's work, however, and the miners at Cobalt had begun to taunt them, and they were going to finish the job or "hust."

Across the ravine above the hole, which was to hold the raised cage of timber jacks in the meanwhile, chipped a path straight through the timber bank, and when the miners were once sunk to the bottom, were filled in with rock and timber, and before work on the power plant was completed they had laid seven steel pipe lines, the twenty-four inch lap welded pipe line of German steel, which was to carry the air eventually and was laid in sections as it arrived, from twelve to three inches in diameter.

Commercial Traveller

John Ballantyne, general trade reporter for Ottawa, recently issued a report on the external trade of the United Kingdom as it affects Canada for the six months ending June 30.

The total value of the merchandise imported into the United Kingdom from Canada, and exported from the United Kingdom to Canada during the first half of each year of each of the years 1910 and 1911, were as follows:

The figures given being in pounds sterling, the value of the United Kingdom from Canada, 1910, £10,359,000, 1911, \$48,400,000.

Exports from the United Kingdom to Canada of all kinds of goods during 1910, £51,600,000, 1911, \$64,000,000, of foreign and colonial produce, 1910, £14,900,000, 1911, £14,700,000.

The exports to Canada were lower than those of last year, but the imports from Canada were lower by two millions sterling, of which nearly one and one-half millions were due to diminished imports from Britain, while imports from Canada were £23,25,000 in the first six months last year, while they were only £23,22,000. Bacon and ham, however, show an increase from £29,000 to £27,000.

Exports from the United Kingdom to Canada of all kinds of goods during 1910, £51,600,000, 1911, \$64,000,000, of foreign and colonial produce, 1910, £14,900,000, 1911, £14,700,000.

The exports to Canada were lower than those of last year, but the imports from Canada were lower by two millions sterling, of which nearly one and one-half millions were due to diminished imports from Britain, while imports from Canada were £23,25,000 in the first six months last year, while they were only £23,22,000. Bacon and ham, however, show an increase from £29,000 to £27,000.

Commercial Traveller

Trade With Britain.

John Ballantyne, general trade reporter for Ottawa, recently issued a report on the external trade of the United Kingdom as it affects Canada for the six months ending June 30.

The total value of the merchandise imported into the United Kingdom from Canada, 1910, £10,359,000, 1911, \$48,400,000.

A Bright Outlook

The harvesting season is upon us once again, and the old familiar sound of the binder is heard in the grain fields. With the present spell of delightful weather, the unpleasant memories of what we have already gone through, begin to fade away, and things begin to assume a brighter and more cheery aspect. Granted good weather—and there is every prospect for it—this should be a record year for Western Canada, and 1911 is likely to be earmarked as one of untoward prosperity. It is true that in our own immediate district we suffered somewhat severely from hailstorms, but taking everything into consideration and viewing things from a general standpoint, we have no reason to be pessimistic.

Speaking of hailstorms, we think the time is not far distant when a universal insurance tax will be imposed both on improved and unimproved lands throughout the Province of Alberta. The various Boards of Trade are taking the matter up at the present moment. This it seems to us would afford a much needed protection to all farming communities.

We are glad to think that the country is entering on another prosperous era, and it is safe to assert that the year 1912 will be remarkable for its development. Western Canada has no room for the pessimist.

Getting Ready

Our annual Fall Fair will soon be with us, an event which is always looked forward to with interest. Those who intend exhibiting—and we hope there are many—will be quickly making preparations now. The prizes offered in the different sections are sufficiently attractive to insure the liveliest interest and the keenest competition. In addition to the exhibits of stock and farm produce, there will be a good sports programme provided, so that everything is being done to place the fair of 1911 far ahead of its predecessors.

Remember a Fall Fair is the best advertisement our district can possibly have. If anyone is desirous of information of any kind, the Secretary of the Agricultural Society, H. B. Atkins, will be very pleased to give it.

The Prize Lists are now on hand, and can be had on application to the Secretary.

A disheveled citizen rushed into a Boston police station one afternoon and shouted for vengeance.

"The automobile that hit me five minutes ago was No. 41144," he spat.

"I can prove that he was exceeding the speed limit, and I want—"

"You want a warrant for his arrest?"

"Warrant, nothing. What good would a warrant do me at the rate he was going? I want extradition papers."

Stock Reducing Sale Of Implements

At prices that will defy Mail Order Competition. The following is a partial list:

\$3,600

in Cash Prizes for Farmers

Your Photograph May Win a Prize

A MONG the prizes we are offering in our big Photo Contest is one of \$100.00 (Prize "C") for the farmer in each Province who furnishes us with a photograph showing the best of any particular farm or farm on the prairies during 1911 with "CANADA" Cement. For this prize, work of every description is included.

Now just as soon as you finish that new silo, barn, feeding floor or dairy, that you've been thinking of building, why not enter? And don't think that your photograph doesn't necessarily have to be taken by a professional or an expert. In fact, your son's or your daughter's camera will do nicely. Or failing this, you might use the services of a professional if you like. In any event, don't let the idea of having a photograph made deter you from entering the competition. Furthermore, it is required that you see your local dealer to help him cause where it is not convenient for the farmer to procure a camera in the

neighborhood. By this means you are placed on an equal footing with every other contestant. On the circular which gives you full details of the contest and of the other three prizes, every dealer who sells "CANADA" Cement will have on hand a supply of these directions. If you will just ask for it. Or if you prefer, you can use an attached coupon—or a postcard will do—send it to us and we'll receive the complete details of the contest by return mail.

If you haven't got your copy of "What the Farmer Can Do With Concrete" write for that, too. It's a finely illustrated book of 160 pages full of useful and practical information of the uses of concrete.

Write to-night, and you'll receive the book and the circular promptly.

Do not delay—sit right down—take your pen or pencil, and all out the coupon below.

Canada Cement Company, Limited,
National Bank Building, Montreal

Lumber

and

Shingles

FOR SALE

About 50,000 feet of Lumber at \$14 and \$15, also Shingles.

Didsbury Cement Brick Company

Business Interest For Sale

On account of having taken a homestead and pre-emption in the eastern part of Alberta, where my family is located, I have decided to sell my one-fourth interest in the Alberta Cement Co., which is in a prosperous condition. For further particulars apply to D. G. Moyer, East Didsbury, P. O. Box 163.

It is not the quantity of food taken but the amount digested and assimilated that gives strength and vitality to the system. Chamberlain's Stomach and Liver Tablets invigorate the stomach and liver and enable them to perform their functions naturally. For sale by dealers everywhere.

Neapolis Notes

Born—To Mr. and Mrs. John McClaren of Neapolis, Saturday, Sept. 9, a son.

W. C. T. U. NOTES

Seven good reasons for Prohibition.

During a temperance campaign, a lawyer was discussing with no little show of learning, the clauses of the proposed temperance law. An old farmer who had been listening attentively shut his knife with a snap, and said: "I don't know nuthin' about the law, but I've got seven good reasons for votin' for it." "What are they?" asked the lawyer, and the grim old farmer responded, "Four sons and three daughters."

—Youth Instructor.

The next Temperance meeting will be held Thursday afternoon at 3 o'clock on Sept. 21 at the home of Mrs. D. M. Stuart, Topic, An hour with John B. Gough.

Will all ladies respond to roll call with a quotation from J. Gough?

Life is a man's greatest enemy, because it robs him of health, happiness, home and honor. It professes to make a man happy, but gives him a headache and a remorseful heartache after.

Melvin Pick-ups

Mrs. August Olsen went to Calgary Monday to visit her daughter, Mrs. Hurst.

Harvesting is in full swing.

Mr. and Miss Shantz were Sunday visitors at Gail Swingle's.

Mr. W. H. Jennings visited at Mr. Meeker's on his way to Presbytery at Innisfail.

Mr. G. Swingle and Miss Huston attended church at Harmattan on Sunday.

Mr. and Miss Jackson attended church in Didsbury on Sunday.

The Sunday School is preparing a program for Rally Day, which comes off the 24th of September.

A Sure Test

A sure test of whether a man is worth his salt is watching him doings on arriving home with a horse or team in bad weather. If, for example, he is soaked to the skin, and after putting his horse in the stable just as he goes and looks after his own needs first—changing his clothes and having a good meal, and then turning his attention to the stable—that individual is not much good, whether the horse is his or not. But the man who, soaking wet and worn out with labor, first makes the beast that has worked for him all day thoroughly comfortable, rubbing him down vigorously, and seeing to it that he has a comfortable bed, a warm stable, and, after a short while if he is very tired, a good feed and good water, whether the horse is his or not—that's the man to be respected.—The Homestead.

Man a Political Animal

One of the greatest benefits that could happen to agriculture in Canada would be for every farmer to take an interest in politics, and use his voice and influence with intelligence and patriotism. Then we should go ahead fast, and everyone would gain except the sharks.

Trusts and combines which now use the wealth they have, in too many cases, cased away from the farmer, to help the corrupt politician to bleed more from him, would go to the wall pretty fast.

Politicians both good and bad keep a constant eye on the trend of public opinion—they must do so or they perish—and the will of the farmer, the most powerful class in the country, has only to be definitely known and it will be obeyed.

On the other hand, neglect political questions and your vote, and you'll be robbed right and left. It has always been so. It's not only a farmer's duty but his interest to use his vote.—High River Times.

Marriage is a Lottery

Oh, marriage is a lottery! That fact no one sees. Therefore love letters should not be permitted in the mails.

—Town Topics.

Farmers' Taxes

You often hear stories of the millions of dollars contributed to humanity's wealth by the humble hen, how for example the hens of the United States can pay off that country's national debt in three months, and so on. Stories, bigger and equally true, though far less cheerful, could be told of the riches lost to us every year by the hundreds of diseases that infect our various crops. They tax the people of this continent hundreds of millions yearly, yet we raise no great fuss about it. This is just as well, for it would be quite useless. Science is a great benefactor of ours, and points out many useful remedies, but it never stamps out one of these big relentless tax gatherers, and shows no likelihood of being able to do so.

These diseases have several ways of getting themselves spread. The rusts which attack the various grains, for instance, are thought to be carried sometimes for hundreds of miles by the wind and though favored by bad weather, very often, are not, as many think, caused by it. If the seeds were not there, nothing could produce the disease.

Another great class of beings that are eternally robbing man of the fruits of his labors and the gifts of nature is to be found in the insect world. Hundreds of varieties of insects also tax the people of this continent to the tune of hundreds of millions yearly, yet as in the other case, we are helpless to exterminate the foe. Indeed in some cases, like that of the potato bug, we are powerless to stop their spreading over the country, as the insect just mentioned is steadily doing. There is but one way, hitherto hit upon, to stamp them out, and that is to starve them to death by ceasing to grow the food they live on. But we want that for our own food, and thus is impractical.

It is true that a noxious insect could be stamped out for some years in a district, if all the growers in that district could be induced to unite in ceaseless to grow the plant it preys on. This would be a most effective method and its good effects would last for years, but unfortunately no such agreement has ever yet been brought about in any district. It is obvious too that the outside members of such a district would gain comparatively little benefit from it, for the insects from the adjoining lands would soon migrate to them. Nevertheless, as is well known, a farmer can do himself a great deal of good, when he finds his land infested by an insect preying on any particular crop, by desisting from growing that crop and all plants allied to it, for some time. He will thus starve to death thousands if not millions of the insect that is causing him losses. In fact, one of the most cogent arguments which can be brought forward in favor of rotation of crops is the destructive effect it has on insects, diseases, and lastly, the third great enemy of the farmer, weeds. For weeds which flourish and multiply with one crop will starve or be stamped out in other ways with another crop. But the reader is too well acquainted with the uses of rotation of crops to render it necessary to enlarge on the subject.

No, the farmer's war with his three big enemies, insects, weeds, and disease will almost certainly be eternal, but the more vigorous the fight he puts up, and the keener the watch, the greater his reward.

The Man and the Farm

Farming is, fortunately for the world, one of those occupations the satisfaction of which does not depend upon the amount of money to be made in a year. There is, first, the satisfaction which comes from the ownership of a tract of land. It is the most stable of investments and a safeguard against numberless anxieties. If, to the skill of the agriculturist, the farmer has the taste of an artist, he may find a joy in so directing the forces of nature along the lines of beauty as to make his farmstead and fields a series of pictures more alluring than can be found in any gallery.

got lost!”—Judge

CHW
DIXIE TOBACCO

Paid for the Privilege

Some people have a great and clear
idea of their rights, and don't fail to
insist on getting them.

A poor woman was sitting near a
front bedroom window in order to
watch her child, who was getting his
first natural sleep after a severe ill-
ness. Her husband had worked hard and
the mother fell asleep. She was awakened
by an Italian pushcart man, who was loudly calling “Banana ripe! Banana ripe!” Ten years ago he had sold
bananas to the child. The mother put up her hand and begged the
Italian to be quiet.

“Aw, what's the matter with you?”
he said, “you pay ten dollar fed ruler
round the streets.”

A few days after school opened,
teacher was testing the members of
one of her old classes on what they
had remembered of the definitions she
had taught them during the preceding
term. Finally she asked the bright
boy of class this question:

“Now, Robert, tell me what a hypocrite is?”

“A hypocrite,” replied Robert with
out hesitation, “is a kid who comes to
school with a smile on his mug.”

He will render the pretense hands
omitting. Other the cure quickly
comes by using Holloway's Corn Cure, which
acts thoroughly and painlessly.

A horse will live twelve-five days
without eating, but it will die within
water, seventeen days without either
eating or drinking, and only five days
when partaking of solid food without
water.

Minard's Liniment cures burns, etc.

“I certainly have a considerable
boss,” he said. “How now? ‘Give me a two
weeks' vacation, and three days to
rest up.’”

“I understand, Mr. Fiddle, that
you are ambition to become an actor,
a great actor, is a great affliction,” Baltimore
Answered. “It is a sour affliction.”—Baltimore
American.

A Remedy for Bilious Headache. To
those subject to bilious headaches, take
one tablet of Dr. Williams' Liniment
twice daily to speedy relief. Take ac-
cording to directions; they will subdue
the bilious headache, and blood vessels that
run over the nerves and blood vessels that
are few who are not at some time sub-
ject to biliousness and not a few will
suffer with these pangs at hand.

Looking Brighter

Father—“That young man was here
again last night.”

Daughter—“Yes, papa.”

Mother—“Anything encouraging?”

Daughter—“Yes, papa,” he said he
heard two could live as cheaply as

Taylor—“The raincoat suits you
splendidly, sir. Makes you look ten
years younger.”

Customer—“Good. Then you can
send in the bill in 1921.”—Phlegm
Blatter.

I suppose you will soon be giving
up your motor and getting an air
plane? Not at all, replied Mr.
McKinney. “There's no fun in going
away up there and frightening a few
engines.”

Last Week's Arrivals Of Fall Goods

Last week was a busy one with us. Opening and placing in stock many lines of new fall merchandise. This week the balance of our heavy purchase will see its way into the store. Come in and have a look.

Ladies New Winter Coats We have secured this season. These coats are never sold outside of cities. Certainly we are fortunate to have the pleasure of introducing them for the first time in Didsbury. Really they are something swell.

Skirts for Stout Women We are showing for the first time a range of skirts for stout women. Waist measure from 26 to 36 inches, in black only.

Ribbons The largest gathering ever shown in town, all shades and widths.

Corsets Another shipment of the famous Le Parisian Corsets in the short, medium, long and extremely long hip. Nursing Corsets in all sizes and Corset Waists for Girls, Misses and Children.

Clothing Our new samples for Campbell's Made to Measure Clothing have just arrived, some very striking patterns in the lot. Your clothes will fit if measured by us, and wear if made by Campbells. Suits made to your measure for \$17.00 and up.

CARBON BLACK ELASTIC PAINT

Carbon Black Plastic Paint is an absolutely waterproof preparation, so elastic in consistency that it will effectively stop leaks in roofs of every description. It is applied in mineral turpentine, felt or berling, and is excellent for waterproofing roofs, walls, tanks, etc. It is also excellent for covering up any damage that may occur in the exterior of buildings, especially when the paint has been washed off. It is also excellent for covering up any damage that may occur in the exterior of buildings, especially when the paint has been washed off.

Funeral of W. G. Reiber

The remains of Bert Reiber were laid to rest on Saturday afternoon at the Didsbury cemetery. There was a very large attendance as Bert was well known and greatly esteemed through his unfailing courtesy in his business dealings and was also extremely well liked amongst the young people of the town. Rev. J. S. Daun conducted an impressive funeral service at the residence and at the Evangelical church, which was filled to the doors. The pall bearers were Ross, Shantz, A. Moore, J. Cooksey, Clayton Snyder, Frank Kaufman, N. Abel.

A very large number of beautiful wreaths and flowers were received amongst them being a cross from his mother and father; Mr. and Mrs. J. V. Borscht, harp; Mrs. (Mrs. He) Veart, spray; Miss M. J. Wright, spray; Goss and Louis Dippel, spray; Mr. and Mrs. Peck, spray; Sunday School and Y. P. A. wreath; Mr. and Mrs. J. E. Liesemer, cross; Mahel Findlater, anchor; Didsbury Lacrosse Club, pillow; Mr. and Mrs. L. S. Curtis, spray; Mr. and Mrs. G. H. and H. E. Liesemer, wreath; Miss A. Grey, anchor; Mr. and Mrs. G. B. Liesemer, spray; Mr. and Mrs. H. Wiegand, spray.

Leave orders for both soft and hard coal at Tom Stark's.

We are now buying live chickens. Bring in all you have. N. Weicker.

Don't Like 'Em

A representative of the Pioneer was informed by a gentleman who had seen them that the ballot boxes to be used at the forthcoming election were not at all satisfactory as they were not substantially made. The bottom of the box is not soldered at all and can be easily pried open with the top, which instead of being locked on the side are locked on the end, and as the boxes are long shaped, this would give a chance to spring the top without unlocking them. Of course these boxes are made locally but strictly according to sample sent by the Dominion government, so that none of the election officials here are to blame, but there is a chance, which should not be given, for allowing the boxes to be tampered with and the government is to blame that they are not made more solidly.

Card of Thanks

Mr. and Mrs. H. Reiber wish to thank their many friends and the public for their kind support and sympathy in the recent illness and death of their son Wilbert.

READY FOR DELIVERY NEW NO. 5

Massey-Harris Binder

Light Running, No Side Draught

We are here for business. Call and inspect our goods. I have recently taken over the Massey-Harris agency and will cater to the trade. Full line of extras and repairs on hand.

Record Globe Trotting

The romantic writer, Jules Verne, once wrote an imaginary account of a trip around the world in eighty days, which impressed his readers very much.

In face of recent world tours it is unlikely that the author would have got away with this yarn. Not long ago Mr. Steigled, of that well known newspaper the Paris Matin, circled the globe in 63 days.

Truly another Frenchman, Andre Jager Schmidt, smashed the record when he alighted from a motor car on the Avenue Champs Elysees after having circled the world in 39 days, 19 hours, 43 minutes and 37 1/2 seconds.

This globe trotter left Paris at 1:45 p.m. on July 17. He struck out for Vladivostok and there boarded a steamer for Yokohama. He arrived a week or so later in Vancouver and crossed Canada to Montreal, pulling into the Metropolis on August 17. He entrained immediately for New York and sailed for Cherbourg. His average speed was 25 miles an hour, and total expenses \$2,500.

By thisfeat of special annihilation, what to Jules Verne was unreal, has been translated to the world of actuality.

Royal Temperance Legion

The regular meeting of the above society will be held in the Baptist church on Friday at 8 o'clock, when in addition to a musical program, a stereopticon lecture will be given, entitled "Shadows of a Great City." Collection. All heartily invited.

More and more women are using our bank for their personal savings. The bank not only offers safety from theft or loss, but removes the temptation to spend money foolishly. There is no way to accumulate the money necessary to purchase some desired article like depositing small sums from week to week.
